TimeAlly - Smart Contract dApp

A Decentralized App (dApp) is based on pre-defined set of rules through Smart Contracts offers multiple benefits to Era Swap Users for Staking and governs the generation & distribution of ES Newly released Token(NRT). TimeAlly increase Era Swap count for TimeAlly contract holders for holding tokens over a period of time

What is a dApp in Blockchain

- Decentralized Applications (dApp) is open source application
- Runs autonomously on **decentralized public blockchain**
- Have existed since the **advent of P2P network**
- Uses **distributed ledger technology** which is neither stored in centralized location nor can be controlled by single entity
- Generates & uses tokens by following a **standard cryptographic algorithm**

Refer to Era Swap White Paper For NRT distribution

Features

ES NRT Distribution

Governs the distribution of ES from NRT pool to users

Nomination

Appoint nominee, who will receive all the benefits of TimeAlly

Control

The private keys stays with the user only giving full control

Privacy

TimeAlly Smart Contract provides privacy to TimeAlly holder

Smart Contract

The entire staked Era Swap(ES) is stored in a trustless smart contract system . This can't be double spend & moved out for any other purpose as this is completely managed by Blockchain based smart contract

Inc case of Less/ More Users

ES count per user will increase for less users to distribute for staking. The Value of ES held may go up as more usage increases value.

TimeAlly Loan

TimeAlly holders will get opportunity to avail loan upto 50% after consuming 75% of contract period

**13% annually (1.08% per month)
of ES Tokens from NRT poolis
allocated to be distributed
among TA Vestors.**

**15% annually (1.25% per month)
of ES Tokens from NRT poolis
allocated to be distributed
among TA Vestors**

**The TimeAlly holders will also
receive 10% Power Tokens annually
(0.8% per month) to reward on
Swappers Wall to community.**

TIMEALLY DEMAND & SUPPLY ECONOMICS

- **If more users** opt for TimeAlly vesting then there will be **scarcity of liquid tokens which will create more demand of ES.**
- This way the **value of ES staked by users is expected to go up** as the price per ES shall increase with increasing demand.

- **If few users** opt for TimeAlly vesting then **more tokens per user will be received.**
- As the number of tokens to be distributed every month is fixed but the **number of receivers is reduced.**
- This way **more ES will be received to these fewer** members.

Features of TimeAlly

Suite of protocols that define **distribution of Newly Released Era Swap (ES) in a decentralized way.**

Every transaction triggered by users are **recorded transparently & irreversibly in block** confirmation so that old transactions are preserved forever for all to see.

TimeAlly uses **Ethereum Virtual Machine ("EVM")**, which can execute code of arbitrary algorithmic complexity following standard cryptography with no downtime and keeping all created objects safe from modifying.

TimeAlly is an open source application & **can work even without any web interface**

Important Guidelines for Users

about TimeAlly DAPP

1. The user should carefully review the whitepaper and website content of TimeAlly DApp to familiarize with the Smart Contract logics & Vesting plans.
2. The User should understand, acknowledge that vesting in TimeAlly are subject to market risks and no assurance on the valuation & its returns since it depends solely on the user itself & distribution is governed by DApp .
3. The Users should read carefully about the vesting plans and completely understands the risk factors associated with the vesting plans on the date of the transaction and thereafter. The user should consider their specific requirements before choosing any vesting plan with TimeAlly DApp.
4. The Users are advised that the vesting in TimeAlly is based and dependent on the submission of information by user and the User shall be solely responsible for any submission of incorrect or non-submission/omission of necessary and accurate information. The User confirms and believes that transaction/s undertaken is/are appropriate for the User as per the objective of the User.
5. The User should confirm that the decision for vesting, claiming or undertaking any transaction on the TimeAlly DApp is taken with complete knowledge & ownership with user itself.
6. The User should recognize vesting in Time Ally involves certain risks and will take full cognizance of and understand all of the risk factors related before investing in Time Ally Contracts

TimeAlly DApp does not give any guaranteed returns in FIAT or crypto. Please read the Howey test and do your research before proceeding.

7. The User should understand and accept complete responsibility & liability for any damages or losses, however caused, in connection with the vesting, use of, or on the reliance of DApp .
8. Do not participate in offerings where one or more people offer you a guaranteed return in exchange for an upfront deposit. The end result is that usually a lot of people loose a lot. Guarantee is given on something which you control or hold. TimeAlly Vault holds the token allocated from NRT every month. Thus the guarantee can be given by Smart Contract as they hold all the tokens which will be released over next 50 years. It can guarantee only the release of Era Swap (ES) from NRT Pool. Because all tokens which are to be released in future are stored in vault and are distributed based on the work performed by the users among them
9. Era Swap doesn't guarantees any Fiat or Crypto because Era Swap doesn't control any Fiat or any other cryptocurrency. Era Swap token (ES) can only be used in the Eco System. ES cannot be used outside Era swap Ecosystem.
10. The User can claim rewards based on the work performed in the ecosystem or vesting done in TimeAlly. As per preset rules, if the user has performed tasks, then they are eligible for rewards. In this case only, user can come and withdraw from TimeAlly DApp. The users will be solely responsible for claiming the rewards.
11. Phishing websites often go hand-in-hand with phishing emails. Phishing emails can link to a replica website designed to steal login credentials or prompt one to install malware. Do not install software or log in to a website unless you are 100% sure it isn't a fake one. Phishing websites may also appear as sponsored results on search engines or in app marketplaces used by mobile devices. Be wary that you aren't downloading a fake app or clicking a sponsored link to a fake website. It is completely on User's risk and the user is only liable for any such activity.
12. The creators of TimeAlly DApp have the right to upgrade the software as per requirement time to time, enhance the features for better users experience, bring in better suitable and innovative Technology and Blockchain versions, perform changes and improvisation in case of unforeseen technology glitch
13. All users using services agree & warrant that they not a national, citizen, permanent resident or resident of a prohibited jurisdiction. Privacy Policy

The profile of all the members on the platform shall be explicitly confidential and not disclosed to any other member of the platform unless express consent is sought by the member. Data will be held in a distributed fashion. This is important to avoid the user data breaches that befall centralized databases. The use of KYC (know your customer) is always a balance between the freedom of anonymous use of Digital assets and the ability to interact with other businesses, banking institutions, and all countries. We have made the decision to use KYC on all purchase of tokens for the good and long-term success of the ERA SWAP community. We hope it would never come to this and will take every effort to be a company worthy of your trust
